## Hanging Wall, Assessment Unit 50200401 Assessment Results Summary

[MMBO, million barrels of oil. BCFG, billion cubic feet of gas. MMBNGL, million barrels of natural gas liquids. MAS, minimum accumulation size assessed (MMBO or BCFG). Prob., probability (including both geologic and accessibility probabilities) of at least one additional accumulation equal to or greater than the MAS. Accums., accumulations. Results shown are fully risked estimates. For gas accumulations all liquids are included as NGL (natural gas liquids). F95 represents a 95 percent chance of at least the amount tabulated. Other fractiles are defined similarly.

Fractiles are additive under the assumption of perfect positive correlation. Shading indicates not applicable]
